White-Westinghouse introduces a new cassette type split air conditioner that is perfect for the home or office!

Airflow is evenly distributed throughout your room by a four way discharge vent system that provides maximum cooling and comfort.

Your furniture and flooring is protected by an Anti-Drip prevention system. The system includes a full signal and automatic shutoff to prevent damage to your home and furnishings.

Prevent small children from adjusting the temperature control by "locking" your temperature setting on the easy to use remote control.

Automatic louvers, a 24 hour on/off timer, auto-restart and a washable nylon filter are convenient features available on both models. 24,000 and 48,000 BTU models available.(Cool Only)
